Bhagya Madusanka

Senior DevOps & MLOps Engineer | AWS & Azure | Kubernetes,
Terraform, Docker | Building Reliable, Scalable Cloud Systems
Frankfurt Rhine-Main Metropolitan Area

Summary

Hello! I'm Bhagya Madusanka, a Senior DevOps Engineer with over 10 years of experience building scalable, secure, and automated cloud solutions across AWS and Azure. I'm passionate about optimizing infrastructure and enabling faster, more reliable software delivery through automation and DevOps best practices.

My expertise includes Kubernetes (EKS), Terraform, Docker, and Python, along with strong MLOps experience, setting up AWS SageMaker endpoints, notebooks, and training jobs, and building GitHub Actions pipelines to automate model containerization. On Azure, I've delivered solutions using API Management (APIM), Functions, Cosmos DB, and Databricks to support data-driven systems.

I've contributed to leading organizations including Adastra GmbH, DevoTeam GmbH, Sysco LABS Sri Lanka, and CodeGen International, designing CI/CD pipelines, managing cloud infrastructure, and implementing monitoring and security best practices. I enjoy mentoring teams, fostering collaboration, and continuously exploring new technologies to drive innovation and efficiency.

Experience

Adastra

Senior MLOps Engineer

April 2024 - Present (2 years 2 months)

Frankfurt, Hesse, Germany

Devoteam

Senior AWS Consultant

March 2022 - March 2024 (2 years 1 month)

Frankfurt, Hesse, Germany

Sysco LABS Sri Lanka

2 years 10 months

Associate Technical Lead - DevOps

August 2021 - February 2022 (7 months)

Senior DevOps Engineer

May 2019 - July 2021 (2 years 3 months)

CodeGen International

Engineer-Systems

August 2017 - April 2019 (1 year 9 months)

- * Involved in designing and deploying applications utilizing almost all of the AWS stack(including EC2, RDS, S3, Route 53, ELB,) focusing on high availability, fault tolerance and auto scaling
- * Shell Scripting for Automation of tasks.
- * Oracle / MySQL Database administration & troubleshooting.
- * Apache-Tomcat/JBOSS/WASP application server deployment, Administration & Troubleshooting.
- * Automation day to day tasks using RUNDECK.
- * Providing Solutions to customer issues.
- * Linux System Administration.
- * Installing, Managing and Troubleshooting ZABBIX monitoring tool
- * Configuring queues and queue manger (Active MQ).
- * Developing disaster recovery plans.
- * Installing, managing, Administrating Oracle DB and MYSQL
- * Installing and Configuring elastic search with KIBANA
- * Closely worked with dev team to fix production level issues
- * Developing Docker images to support Development and Testing Teams and their pipelines.
- * Implementing monitoring and reporting solutions across a range of environments and platforms
- * Developing scripts for build, deployment, maintenance and related tasks using Jenkins

Simato VAS Solutions Private Limited

System Administrator

December 2015 - August 2017 (1 year 9 months)

- * Provided technical expertise for IT network design, implementation, optimization and upgrade.

Monitored the LAN/WAN network environment including routers, switches, firewalls, Internet access and software applications.

- * Experience in a Unix/Linux environment and expertise in several flavors of Linux

including Red Hat, CentOS, Kali Linux and Ubuntu.

- * Experience in Managing and Configuring Cloud (Amazon EC2, VPC and Godaddy

cloud, 1 and 1 cloud) and Apache HTTP Server.

- * Installed and configured all the Linux servers in the network per specifications of clients.

- * Experience in VMWare.

- * Monitored the servers and Linux scripts regularly and performed troubleshooting

steps – Tested and installed the latest software on server for end-users.

- * Maintained the timely back-up of important data and management resources.

- * Experience in installing and configuring MySQL databases.

- * Experience in infrastructure monitoring tools such as Nagios.

- * Experience in Configuring transparent proxy such as squid.

- * Managing users, services and ports in Linux servers.

- * Proficient Knowledge in Shell Scripting and basic knowledge in python.

- * Experience in Web Server administration.

- * Conducted periodic performance tests on existing servers.

- * Experience in configuring Cisco ASA firewalls.

- * Experience in install, setup, maintain network and also configure peripherals, cabling and maintenance of the enterprise network component.

- * Experience in installation of software like Node, npm, sails, mongo dB, bower, angularJS, grunt, etc.

- * Managing database servers and importing and exporting database dump.

- * Attended calls related to customer queries and complaints, offered solutions.

- * Automate administration tasks through use of scripting

- * Apache web server: PHP configuration, Virtual hosting.

Education

SLIIT

Bachelor's Degree, Computer System and Networking · (2012 - 2015)
